Clinical Fellowships

UCSF offers two clinical fellowship opportunities to those physicians who wish to expand their expertise in Radiation Oncology. One is CNS and the other is a special fellowship which can be created to suit the interests of the trainee. Interviews are generally held at ASTRO \[1\] with exceptions being made for those people who will not be in attendance. Offers will be made shortly after the ASTRO meeting.

Prerequisites

1. Four years of United States medical education or an ECFMG certification (for graduates of foreign medical schools).
2. A preliminary one-year internship in medicine, surgery or a transitional year at an accredited institution is required prior to beginning radiation oncology training.
3. Four years of training in an ACGME accredited Radiation Oncology residency program.
4. Possession of a California medical license by the first day of fellowship training.
