## Learning Experience / Didactics

Our residents are important to us and we are committed to outstanding teaching at all levels of resident training. There are courses in Radiobiology and Physics specifically for first-year residents as well as twice monthly Radiobiology or Physics lectures for all residents. Residents attend daily, hospital-based didactic sessions . These are held Monday through Friday at 8 AM. Many sub-specialty sections offer their own "one-on-one" teaching sessions in addition to the didactic sessions for all residents.

The educational experience is also strengthened by participation of attending and resident physicians in a number of multidisciplinary clinics and multidisciplinary tumor boards. Also, many sub-specialty sections offer their own "one-on-one" teaching sessions.
